QlikView® November 2017 SR2 Release notes

What's new in QlikView November 2017 SR2

QlikView November 2017 SR2 includes only bug fixes.

What's new in QlikView November 2017 SR1

QlikView November 2017 SR1 includes the following updates:

Change Notes sharing settings for AJAX clients

For AJAX clients, it is now possible to change the default value for who is allowed to see a note connected to an object.
To change the sharing settings, you must modify the following entry in the settings.ini file:

`NoteSharingDefaultAccess=0` Only the creator can see the note.

`NoteSharingDefaultAccess=1` The note visibility is set to public and anyone can see the object (Default setting).

`NoteSharingDefaultAccess=2` Visibility is restricted to specific users.

New procedure for changing time-out setting for QlikView Server

From QlikView November 2017, the procedure for modifying time-out setting for QlikView Server has changed. To set a time-out period different from the default settings of 60 seconds, you must modify the QVWebServer.exe.config file by adding the setting SocketTimeOutInSeconds followed by the desired time-out period. The QVWebServer.exe.config file is located in C:\Program Files\QlikView\Server\Web Server.

The previous time-out setting QvsTimeout, located in C:\ProgramData\QlikTech\WebServer\Config.xml, is no longer applicable. If you had previously modified QvsTimeout to apply a custom time-out period, you must set the same value for SocketTimeOutInSeconds in the QVWebServer.exe.config file.

BUG FIXES INCLUDED IN QLIKVIEW NOVEMBER 2017 SR2:

QlikView November 2017 SR2 includes fixes for the following issues entered in Jira:

Multiple search results are presented differently in QV 12.00 or higher compared to 11.20

Jira issue ID: QV-12383

Time format changed to serial number when selecting "Send to Excel"

Jira issue ID: QV-13002
